JLG® TELEHANDLERS REACHING OUT

Your productivity is on the line the minute you climb into the telehandler cab. The lineup of JLG® telehandlers gives you all the power, reliability and maneuverability you've come to expect from a world-leading equipment manufacturer. With capacities from 5,500 to 12,000 lb and heights up to 55 ft, you can handle any job site challenge with these pick and place telehandlers. From commercial and residential construction to steel work and framing, JLG telehandlers can get you around crowded work areas to get the job done.

Your day won't seem so tough or your loads so heavy—if you let the power of JLG do the heavy lifting.

"We had a tight deadline and still needed to place tons of block. With JLG telehandlers, we actually finished ahead of schedule."

JLG

JLG

1255

DuraTough Hood Design

Our hoods consist of a new, heat-resistant polymer that is more durable than ABS or fiberglass.

Ultra-Strong Boom

Lift higher and farther with more confidence with a boom strong enough to handle heavy application work.

EQUIPMENT YOU CAN COUNT ON

We know that when you're on the job, you need machines that are going to stand up because downtime is simply not an option. That's why our equipment is manufactured and designed to the highest standards of quality. They also have some of the highest resale values in the industry. JLG is dedicated to providing high-performing, quality equipment you can rely on day after day.

"If you want a machine that just keeps on going—this is it."

Firestone Tires

Firestone DuraForce MH tires lower your cost of ownership because they are less susceptible to sidewall damage and last up to three times longer than Firestone SGG telehandler tires.

Testing Facility

Our modern test facility ensures that our telehandlers provide you with high performance when you need it most.

"Between the rear axle stabilization and intuitive controls, I've never felt more confident placing loads."

Rear Axle Stabilization

Our exclusive Stabil-Trak system transfers from a 3-point to a 4-point stance for increased stability and operator confidence.

Optional Multifunction Display

Everything you need at a glance—integrated electronic load charts, a reversing camera, onboard diagnostics and analyzer capabilities.

REDESIGNED WITH YOU IN MIND

You can never be too careful on a job site. That's why we redesigned our telehandlers to help you navigate terrain more confidently and move materials more efficiently. Our new cab design gives you better field of vision while an optional reversing camera and reverse sensing system alert you to objects behind your machine. Plus, with our Stabil-Trak rear axle stabilization system, you'll feel more confident when landing loads.

Real Stability, Real Confidence

The solid overall design of these telehandlers means you can depend on them to carry loads up to 5,000 lb capacity at maximum lift height, and still have enough power to handle the biggest jobs.

Fuel-Efficient Tier 4 Final Engine

Achieves a greater level of fuel efficiency with less environmental impact.

Ride Control Option

Improves boom control over rough terrain.

Reversing Camera

Back up with confidence thanks to an optional rearview camera.

Intuitive Joystick

The single joystick controls all boom functions, auxiliary hydraulics and standard declutch.

WELCOME TO YOUR REDESIGNED CAB

It's your space for hours at a time. Not only do you want to be more comfortable while performing your work, but comfortable conditions also help keep you more productive. That's why we asked operators for their input when redesigning the cab. The result? A more spacious cab with an integrated arm rest to reduce fatigue and a seat design so comfortable you'll feel like you're sitting in your favorite chair.

We didn't stop there. The optional multifunction display includes electronic load charts, displays diagnostics and offers a reversing camera. As for visibility—you've got a clear view of everything going on around you.

Reverse Sensing System

This optional system alerts operators of rear obstructions.

Enhanced Visibility

The engine position, single compensation and lift cylinders make for better visibility from the cab.

MACHINES THAT HAVE NEVER BEEN EASIER TO MAINTAIN

Downtime is money lost. Whether it's routine maintenance or a service matter, technicians are under fire to perform their duties as efficiently as possible. Our reengineered telehandlers help them access engine parts and other serviceable components more quickly to keep you running at peak performance on the job site.

We've taken other precautions, too, by mounting the external telescope cylinder on top of the boom. This makes it less susceptible to damage while providing easier access for service. The side-mounted engine also makes filters and parts more accessible.

Fewer Components

A single compensation and lift cylinder mean there are less components to maintain.

Remote Diagnostics

Quickly and easily troubleshoot equipment from up to 150 ft away.

MORE POWER FOR MORE PERFORMANCE

JLG® Tier 4 Final telehandler engines and powershift transmissions deliver the horsepower, speed and control you need for optimum performance. You can lift and place heavy loads with confidence, knowing your telehandler will get you there. The powertrain is equipped with a transmission and axles that provide a smooth ride and superior terrainability.

JLG® telehandlers let you work around obstacles, thanks to three distinct steering modes that allow you to maneuver crowded areas. Drive over varied terrain with greater ease. With up to 18 inches of ground clearance, you've got more room to travel over debris.

Drivetrain

Equipped with transmissions and axles that provide a smooth ride and outstanding terrainability while traversing a job site.

Turning Radius

A tight turning radius helps you get around in crowded areas.

JLG® Telehandlers
ATTACHMENTS & ACCESSORIES

Standard Carriage
 Forks that are fully floating and adjustable side-to-side for efficient load entry and exit.

Pallet Forks
 Rugged design makes it easier to handle heavy palletized material.

Side-Tilt Carriage
 Allows for minor lateral positioning of the load during final placement.

Lumber Forks
 Wider width provides a larger surface area for stability when transporting longer material.

Swing Carriage
 Allows for greater versatility in moving and placing materials in confined areas or when exact positioning is required.

Cubing Forks
 Allows operator to load, unload and place cubes of brick and block with ease.

Dual Fork Positioning Carriage
 Provides the ability to adjust the position of each fork independently, allowing the operator to handle a variety of palletized loads without having to leave the cab.

Fork Extensions
 Fork extensions provide additional support to lift large or long objects. They are made with heavy duty steel and a pin is used to secure them to the existing telehandler forks.

Side-Shift Carriage
 Four-inch left and right carriage shift allows for precision load placement.

Material Bucket
 Clean up the job site, spread gravel or for loading and leveling.

Hitches*

Air Ride Seat*

Rotating Beacon

2nd Auxiliary Hydraulics*

Molded Floor Mat*

Radio Ready Kit*

Tilt Steering*

Fenders

Brick Guard

Air Conditioning

Reverse Sensing System*

Grapple Bucket

Features a hydraulic grapple arm to assist in job site cleanup.

Fork-Mounted Work Platform

Extend the capabilities of your telehandler and get more work done by lifting material and persons to working heights.

Pipe Grapple

For handling multiple pipes or a larger single pipe.

Lifting Hook

Add versatility to any standard carriage by lifting and lowering objects without changing attachments.

Material Handling Arm

Designed for lifting and placing objects around the job site, the material handling arm is ideal for building construction and civil engineering applications.

Coupler-Mounted Lifting Hook

For lifting and lowering objects.

Truss Boom

Allows operator to set trusses and wall sections for wood and steel building construction. Available with or without winch.

Trash Hopper

For collecting trash on the job site, with automatic opening and self-closing.

PUTTING YOUR WORK ABOVE EVERYTHING

When it comes to JLG® Support, it's all about you. Your productivity. Your profitability. Your uptime. From the purchase of your first piece of equipment straight through to the training, parts and maintenance that follow.

- **Customer Service Call Center**

You can be assured we'll be giving an all-out effort to support you. Just think of us as your personal on-call, full-service support team. We make it happen. Period.

- **Financial Solutions**

Maximizing your profits. Preserving your cash flow. Let our financing specialists help choose the program designed specifically for your needs.

- **Aftermarket Parts**

Keep your equipment running at peak performance with genuine replacement parts, accessories, attachments, rebuilt and competitive parts all from one source — JLG.

- **Training**

Knowing your equipment inside and out results in higher productivity on the job. Our instructor-led courses give you the hands-on time you need for success.

- **Service Centers**

Your needs. Your uptime. JLG is on the job to fulfill your every need, from repair, reconditioning, same-day parts and much more. We're here to support you.
