

SUSTAINABLE CONCRETE SLABS
LESS LABOR LESS DOWNTIME LESS ENVIRONMENTAL IMPACT

 **SLABARMOR™**
STARTER

SlabArmor™ refines the surface of the slab while retaining 97% of the placement water, significantly minimizing volume loss, cracking and curling.

TROWEL-IN CURE

Using power trowels, this nano-sized technology creates up to a depth of 1 inch barrier allowing only 3% of the water to evaporate which ultimately eliminates volume loss cracking and curling. It acts as a finishing aid, holding water in for weeks if not months on end. It is invisible to the eye and almost impossible to apply incorrectly.

Exceedingly high and stable flatness (FF) numbers are a direct result from even hydration throughout the slab which also helps to control the finishing process while maintaining internal slab moisture.

SlabArmor™ Starter extends material life by closing capillaries within the slab, reducing surface abrasion and creating a sustainable surface profile.

Denser concrete enhances insulation qualities and improves energy performance.

TRANSFORM YOUR SLAB

Attain levels of gloss and reflectivity you never thought possible with power trowels. Save time and money by compressing your project timeline and completing ahead of schedule. Achieve results that last while reducing maintenance expenses and upkeep requirements over the life of the slab.

EarthSmart™

MQ Whiteman Concrete Solutions are environmentally neutral compositions. Finish your job secure in the knowledge these products pose no risk to crew members or the environment. A benefit on jobs with LEED requirements.

PRIMARY APPLICATIONS

- Polished Concrete
- Institutional Facilities
- Retail Showrooms
- Industrial Floor Slabs

FEATURES & BENEFITS

- Neutral pH
- No Rinse Formula
- Patented Concrete Hardening Chemistry
- Non-Damaging
- Concentrated
- No Phosphates, No Sodium Hydroxides, No Butyls
- Cost Effective
- Environmentally Responsible
