

OPERATION (cont)

Drain Pump Kit (Optinal)

A drain pump kits are available to allow continuous operation and to eliminate the need for a drain tank.

When the water collects to level (A) in the pump reservoir, the drain pump begins to operate and discharge the water.

NOTE : The compressor will not operate while the drain pump is discharging in water for the Office Pro 12 and Office Pro 18.

When the water level drops below level (B), the drain pump stops, and the compressor will restart.

NOTE : If the Fan Mode Control DIP Switch is set to the STOP position, the entire unit (including fan operation) will turn off when the drain pump is discharging water.
