

POWERFUL AND PRODUCTIVE

TURF RENOVATION EQUIPMENT

21" Single Hydraulic Aerator

30" Stand-On Aerator

BUILT FOR PRODUCTIVITY

- 30" width at speeds up to 7.5 mph
- Raise and lower tines with foot pedal
- Fuel capacity extends operating time

MECHANICAL | SINGLE HYDRAULIC | STAND-ON

18" MECHANICAL AERATOR

This compact, self-propelled aerator has **controls similar to a mower for easy operation.** It's powered by a commercial-grade engine with a forward ground speed of up to 3.0 miles per hour. The handle can be folded down for compact transport or storage.

21" SINGLE HYDRAULIC AERATOR

This model features an easy-to-use hydraulic drive system with excellent maneuverability — **no need to raise the tines to turn the machine.** A wide unibody frame with 10-gauge steel construction provides a low center of gravity for excellent side hill stability. Plus, it's compact enough to get into the tightest areas and can aerate in reverse to back out.

21" Single Hydraulic Aerator

30" STAND-ON AERATOR

The 30" stand-on model boasts a Kawasaki V-Twin engine and a hydraulic system that can be **finely tuned to pull any length of plug on the fly.** Electronic foot pedal controls also allow the operator to raise and lower the tines instantly for quick zero-turn maneuvers. And the floating operator platform isolates the operator from vibrations for an exceptionally smooth ride.

30" Stand-On Aerator

Slit Seeders

20" Hydraulic Slit Seeder

DURABLE CUTTING BLADES

Blades are made of high-carbon, heat-treated spring steel that can handle abuse without chipping or bending.

MECHANICAL | HYDRAULIC

18" MECHANICAL SLIT SEEDER

This push seeder has the same user-friendly controls as our walk-behind mowers. The large hopper mixer drives seed delivery automatically — no need to turn off the flow when making turns. Unibody construction also makes the frame **exceptionally strong, yet lightweight**. In addition, this unit has a low center of gravity for hillside stability.

20" HYDRAULIC SLIT SEEDER

Durable, lightweight and easy to use, Toro slit seeders handle like a self-propelled push mower. **Operators can make a tight turn — even on hills — with one hand.** And the variable-speed drive system operates in forward and reverse. For maximum durability, they're constructed of solid 11-gauge steel with high-carbon, heat-treated spring steel blades.

< The seed flow rate can be adjusted on the fly for different applications and seed types.

18" Mechanical Seeder

Power Rake

MECHANICAL POWER RAKE

Our smooth, quiet power rake uses a centrifugal clutch to engage the blades so **dethatching is maintenance-free**. It also uses the same familiar controls as our other mechanical products. To save time, the blades can be changed without removing the reel — and blade height can be adjusted with a simple lever.

Optional accessories allow the power rake to be converted to a seeder for multi-purpose use.

>

The **Choice** for **Turf Professionals** and **Rental Stores**

Now the same durability you count on from other Toro® products is available in a new turf renovation line. Toro aerators, seeders and power rakes deliver high-quality commercial construction, exceptional maneuverability and productivity-enhancing features in one powerful package — the ideal addition to your turf care fleet.
