GENERAL INFORMATION

Welcome! Protect your investment in the world's finest air tools. Use genuine CP replacement parts.

The purchase of replacement parts for your CP tools deserves the same good judgment that resulted in the buying of the tools themselves. Each genuine CP part is made from carefully selected and inspected material, subjected to sophisticated machinery and finishing processes and heat-treated to produce just the right combination of hardness, ductility and impact resistance for its intended use. All parts are manufactured concurrently with those used in production tools, and are identical to them. The use of parts other than genuine CP replacement parts can lead to substandard performance, early failure, possible damage of other parts and, in some instances, unsafe conditions.

To reduce the risk of injury, read and understand the Operating Instructions manual and the percussion tool safety instructions before operating the tool.

CP 4125 is a pneumatic tool designed for rugged use in foundries, shipyards, refineries, fabrication shops and construction applications. The 2" to 4" stroke versions offer the power levels necessary for a variety of uses from light to medium chipping and trimming through heavy cutting.
