

MENEGOTTI TECHNICAL MANUAL

MORTAR MIXER HD

9 CuFt
7 CuFt

Attention:

Before operate **Menegotti** equipament, read this **technical manual**, itself will inform and instruct the operator about the operation.

By the way, you avoid possible working accidents and early maintenance on at the equipment.

Need parts?

Click on this link: <http://www.discount-equipment.com/category/5443-parts/> and choose one of the options to help get the right parts and equipment you are looking for. Please have the machine model and serial number available in order to help us get you the correct parts. If you don't find the part on the website or on one of the online manuals, please fill out the request form and one of our experienced staff members will get back to you with a quote for the right part that your machine needs.

We sell worldwide for the brands: Genie, Terex, JLG, MultiQuip, Mikasa, Essick, Whiteman, Mayco, Toro Stone, Diamond Products, Generac Magnum, Airman, Haulotte, Barreto, Power Blanket, Nifty Lift, Atlas Copco, Chicago Pneumatic, Allmand, Miller Curber, Skyjack, Lull, Skytrak, Tsurumi, Husquvarna Target, Stow, Wacker, Sakai, Mi-T-M, Sullair, Basic, Dynapac, MBW, Weber, Bartell, Bennar Newman, Haulotte, Ditch Runner, Menegotti, Morrison, Contec, Buddy, Crown, Edco, Wyco, Bomag, Laymor, EZ Trench, Bil-Jax, F.S. Curtis, Gehl Pavers, Heli, Honda, ICS/PowerGrit, IHI, Partner, Imer, Clipper, MMD, Koshin, Rice, CH&E, General Equipment, Amida, Coleman, NAC, Gradall, Square Shooter, Kent, Stanley, Tamco, Toku, Hatz, Kohler, Robin, Wisconsin, Northrock, Oztec, Toker TK, Rol-Air, APT, Wylie, Ingersoll Rand / Doosan, Innovatech, Con X, Ammann, Mecalac, Makinex, Smith Surface Prep, Small Line, Wanco, Yanmar

Congratulations, you have just purchased a Menegotti product!

With the highest quality, projected and built especially to serve your needs.

This manual was elaborated to provides the informations and key instructions to use and maintain our product, in addition presents their technical characteristics.

Before use the product for the first time, read and pay attention at the informations in this manual.

The product durability only depends the way you treat it in service (operation) and the satisfactory working is consequence of yours regular work carefully.

Menegotti is preparaded to offer you all technical assistance, and attend all your needs about replacement parts.

Welcome, you are part of the huge Menegotti “customers family”.

**MENEGOTTI After Sales and
Technical Assistance Departments.**

Attention: For better comodity, store and keep this manual in a properly spot so it can be easily checked.

Menegotti Group

Menegotti is reference in the development of solutions in machines and tools for the Construction machinery, Handling and Lawn | Garden Segments.

A Brazilian company, present in more than 40 countries, has its headquarters in Jaraguá do Sul, Santa Catarina, units in Brazil and in the United States.

With more than 80th years of history, it is in the fourth generation of consistent and successful family management.

National leader in sales of concrete and cement mixers, it stands out in the resale and rental market.

Through its Innovation Program, it fosters creativity and competitiveness, with disruptive actions and partnerships, aimed at continuous professional and business growth.

With an organizational culture that values and encourages its constant professional and personal development, Menegotti is active in sustainable projects, which make its purpose of contribute "to build a better and more sustainable world", a reality.

The Product

Menegotti Mortar Mixers are projected to realize the most demanding tasks, developed with robust structure and components which provide greater yield and homogenization for mixing mortar. Their transmission mechanisms facilitate their operation requiring minimum human effort.

Obs.: Menegotti North America, aiming to constantly improve its equipments, reserves its rights to alter the features of the product with no previous warning.

Safety

This manual must be completely read before any operation. On it there is useful information about the product, manufacturer, safety, replacement parts, maintenance and conservation. Keep this manual, on a proper place, so it may be consulted when necessary.

Before using this equipment, carefully, read this manual and follow the Manufacturer's information, such as, how to reduce the risk of accidents in operation.

It is expressly prohibited to remove or alter any safety device or feature, if it occurs Menegotti will not be held responsible.

Use the equipment according to the instructions on this manual.

In case of damage or missing parts, contact Menegotti North America on our telephone number 770-910-7450 for replacement.

With the machine turned off, conduct a daily inspection of the machine's parts. In case of problems, immediately contact Menegotti's authorized service.

Maintain a limited area exclusive for working with the equipment, always keeping this place clean, without obstructions and with proper illumination.

The operator must be trained or qualified to operate this equipment.

Do not use clothing that is too loose and which might get caught in the machine.

Always wear safety gloves and ear protection.

The motors must be installed by qualified professionals.

Perform the maintenance recommended on this manual with qualified people and within the correct periods.

Inspect all electrical, mainly regarding cuts, cable friction and broken connections.

Never use extensions that are not in good conditions.

Never use wet extensions or operate in wet environments (i.e. Puddles).

When cleaning the equipment, never throw water on the motor.

Whenever performing maintenance on this equipment, disconnect the power cable from its source.

Avoid contact with hot surfaces.

Before performing any activity or maintenance, first let the motor cool down.

Avoid contact with rotating parts.

Activation

The Mortar Mixer 9 CuFt is an equipment that was projected to heavy tasks regarding civil construction.

It is composed by a drum with the mixture capacity of up to 7 CuFt. The responsible for the drum's moving is the motor (electrical/combustion), that is activated by a pulleys system – motor and moved – with “V” belts and gears. The unloading system is manual.

Working and Operating Conditions

- Attentively read this instruction manual;
- Menegotti's Mortar Mixers can be used inside or outside (do not use combustion motors indoors due to it toxic gas emission);
- When loading the Mixer with a shovel, the operator should not put it inside the drum;
- The introduction of any object in the drum, as it is on, can cause serious accidents;
- Any not proper use may consist on a threat to the operator and people nearby physical integrity;
- When using this equipment, follow the manufacturer's instructions as a way of reducing the risks of accident during operation;
- Use the equipment as this manual instructions recommend;
- The operator should be trained or qualified to operate this equipment;
- The operator should wear clothes that are not too loose and be well familiarized with the machine's working;
- Keep an exclusive and limited area to work with the equipment, maintaining it cleaning with no obstruction and good illumination;
- It is expressly prohibited to remove or alter any safety device or features;
- If changes were done, Menegotti will not be held responsible to injuries or damages, and the equipment's warranty will be lost; - Motors should be installed by qualified professionals;
- Perform the maintenance recommended on this manual with qualified people and within the correct periods;
- Whenever performing maintenance on this equipment, disconnect the power cable from its source; and
- Tires should be calibrated from 26 to 30lbs.

Noise Level during Operation

Once the noise level during the Mixer's operation with Mortar in the drum can reach 95dBA, it is recommended the use of ear protectors during prolonged operation.

Empty	Full
85-90 dBA	94-95dBA

Lifting, Transporting and Towing

Lifting

The Mortar Mixers should be lifted by the drum shaft, as shown in the image below, harsh moves and hits should be avoided.

BE CAREFUL: Turn the motor off before allowing anyone to put one's hand on the mixture drum.

Transporting

When transporting the machine, it must be secured by the chassis. Make sure it is firmly fixed so as not to cause any falls or accidents.

Towing

Towing is not recommended on roads, only inside building areas.

STEP 1: Insert the yoke into the main structure. Lock it using a M12 screw, 2 washers and a self locking nut. Pass the chain through the hole located between the structure's union plate and the structure's angle. Tie the chain and put it on the traction bar. Lock it with the connection link.

STEP 2: Stretch the chain along the yoke, remove the excess of chain and lock it on the towing vehicle using a connection link.

NOTE: It is important that the length of the chain be properly adjusted to avoid that the yoke and the front part of the mixer don't fall on the floor in case the yoke disconnect from the towing vehicle, even manually.

Working Operation

Working and Equipment's Operation Sites

Place the mixer on a plain and firm surface in a way to make easier the loading and unloading processes.

Workings

1. Place the drum with its opening turned up. This move must be done by turning the drum's lever;
2. Bend the drum up. This move must be done by turning the drum's lever;
3. Once the mixture is ready, turn the drum until unload the mortar; and
4. To fill it in again, let the machine always on, taking the necessary care during the operation.

Working with the Mixer

- 1 - Make use of one measurement (Bucket) to dose the compounds.

- 2 - Put water with the mixer ON ($\frac{1}{2}$ half bucket).

- 3 - Add the mortar verifying its packing regarding the quantity suggested.

Attention!

If one is using the equipment to mix concrete, the grit will block the blades and broke them or the transmission. The mixer is adequate to mix mortar (grout, floor, and tile).

- 4 - At last complete with water check how the mixture should look on the packing.

- 5 - Let the mixer work until the mortar is regular as indicated by the mortar manufacturer escarga.

- 6 - Unload Menegotti's mixers are projected on a ideal height to unloading that also facilitate the transport.

Cleaning and Conservation

DRUM'S GRID

- The drum's opening is covered by an articulated grid that opens by turning the drum (pic. 01) it is safer and facilitate cleaning. This grid must be closed whenever the mixer is on. Do not remove the grid or its opening bar; keep the grid clean by washing it daily.

- When finishing the task, clean the equipment, specially the drum, taking all the mortar of the drum.
- Be careful not to put water on the motor.
- Follow the lubrication periods orientation on the parts where there are grease points.
- If the mortar cures inside the drum it will be useless.

Lubrication

- Keep lubricate the rotating parts of the machine as sealing cover, bushing, piping, bearing bushing and bearing (with the help of the greasing points on the machine).
- Lubricate the equipment in the beginning of the operation, in all lubrication points.
- For the wheel hubs, use high speed and high temperatures grease types.
- Grease the wheel hub every 1000 miles.

Lubrication Points

Pos. (01) wheel's hub (intern)

Pos. (02) pillow block

Greasing the Wheel Hubs

1- Using the plier for dust cap and the hammer, remove the dust cap from the wheel hub.

Note: If you do not have the plier, you can use a flathead screwdriver.

2- With the dust cap removed, check the grease on the wheel hub, they find the **grease fitting**.

Note: Pay attention to the parts **without** grease.

3- Using the grease gun, attach the tip to the grease, and then start pumping grease into the wheel hub until it looks like the picture below.

4- Using the rubber mallet (dead blow hammer), close the wheel hub with the dust cap.

Note: If you want, you can use Loctite 271, in order to not let the dust cap fall of the wheel hub, but you will have to clean the borders of the dust cap to make it more efficient.

Maintenance

ATTENTION: Whenever it is needed to maintain the equipment, the engine must be shut off, wait for all moving parts to stop and let the engine cool. Every maintenance in the equipment, electrical or mechanical, should be done by authorized or qualified professionals.

Never lubricate, service, repair, or adjust the machine with the engine running. The combustion engine's maintenance must be performed as it manual. Always disconnect the wire from the spark plug before maintenance.

Blades' Regulation

1) Mixing Blades

2) Mixing Blades With Scrapper

Blades' Substitution

Changing the blades is a simple thing; it's only needed to follow the described procedure:

- 1- Position the drum with its opening turned down;
- 2 - Loose the nut (01) and take the screw (02) off.

V-Belt's Substitution

- 1- Before using the Mortar Mixer, always check the condition of the engine V-belts;
- 2- Inspect the V-belts and adjust the spring as necessary;
- 3- If the V-belts show signs of wear or loss of flexibility, replace them;
- 4- Every 2 years replace the V-belts;

Drum's Substitution

Changing the drum is a simple thing; it's only needed to follow the described procedure:

- 1 - Position the drum with its opening turned down;
- 2 - Loose the nut (01) and take the screw (02) off;
- 3 - Take the pillow block off (03);
- 4 - Release gear from the main shaft (04).
- 5 - Loose the Screw (05).

Product Warranty

The warranty is not transferable under the conditions and within the prescribed period and will be valid from the date of purchase of the equipment, through presentation of the sales invoice to the first end consumer. At the time of delivery of the equipment, the customer must receive the information and technical guidelines for the equipment as per the content of this manual.

Therefore, defects caused by mistreatment, carelessness, negligence, recklessness or malpractice, are not covered by this warranty, nor are any repairs or alterations of any part and/or piece of equipment. Also not covered is any assembly of the parts by any party other than the factory itself or Technical Assistant, application outside the specification, mechanical or electrical overloads or phase failure, use in an environment for which it was not designed, incorrect voltages of frequencies, incorrect lubrication, damage caused by accidents of any kind, such as floods, strong winds, fires, landslides or resulting from transportation.

The removal or alteration of the serial numbers originally placed on the product void the warranty, which must be presented on the sales invoice and the Warranty Certificate for the equipment in question.

The warranty assumed is limited to the repair, spare parts or parts assembly of the set of parts, in which the review is conducted by an Authorized Menegotti Technical Assistant and authorized in advance by the Factory, to double check the existence of the manufacturing defect. This repair or exchange will be made by an Authorized Technical Assistant, with the buyer bearing the risks or costs of transportation to and from the Technical Assistant, with the labor and replaced parts being free, under the terms of this warranty.

This supersedes any other warranty, express or implied as well as any and all liability or responsibility of our company concerning the above product.

MENEGOTTI After Sales and Technical Assistance departments.

Term of Warranty

By the present CERTIFICATE provided from original purchaser, Menegotti guarantees this product against manufacturing defects, for a period of 24 (twenty-four) months, counted from the invoice issue date of the first end consumer. This equipment's warranty does not include components worn out by use, such as: bearings, steel cable, electrical plugs, gears and engine breaking.

This warranty includes the replacement of parts and repairs due to manufacturing defects duly noted by the factory or Authorized Technical Assistant. This warranty will be rendered null and void in the case of damages arising from accidents, acts of nature, application other than which it was designed, connection to improper electrical supply or subjected to extensive power fluctuations, or, if opened by persons or workshops not authorized by Menegotti.

The consumer will be responsible for freight expenses for transporting the product to the technical assistant or factory.

The machine which includes an engine, this warranty covers internal defects in the motor originating from its manufacture. Defects not covered in this warranty include: overloading due to lack of or excessive phase, use of voltage outside that specified, broken or crushed casing due to negligence during transporting /or storage, coupling or energizing outside specifications and general defects from improper use and/or incorrect installation.

In agreement with these terms,
