ARS 70

SOIL COMPACTOR

EU Stage V / U.S. EPA Tier 4 Final

WHEN MANOEUVRABILITY MATTERS

The ARS 70, Ammann's smallest soil compactor, is one of the most manoeuvrable compactors on the market. It is 16 per cent shorter than the previous generation and features a tight turning radius of 2580 mm (101.6 in). The machine is extremely compact because of its innovative design, which efficiently positions the engine, coolers, liquid tanks and hydraulics in the engine compartment. The ARS 70 also features improved visibility, fuel efficiency and climbing ability.

PRODUCTIVITY

- High compaction output - faster compaction of thicker layers in fewer passes
- No-rear-axle concept – optimal stability and low center of gravity, which significantly improves safety on jobsites
- Variable range of vibration frequencies for added versatility
- ACE^{force} Intelligent Compaction tool for higher compaction efficiency

ERGONOMICS

- Spacious, quiet cab with integrated ROPS structure
- New multifunctional display for intuitive machine control and operation
- Excellent machine visibility with 360° view to machine edges and surroundings
- Innovative travel lever with speed adjustment and wider machine speed range (newly 5+1 speed instead of 3+1)

APPLICATIONS

- Pipeline construction
- Electric cable construction
- Social and industrial development areas
- Housing developments
- Backfill work
- Confined work spaces

SERVICEABILITY

- All service points and engine compartment accessible from the ground
- Wide-opening rear hood for easy and fast daily maintenance
- ECOdrop – machine efficiency and reductions in fuel consumption and required fluids
