

FOR A BRIGHTER JOBSITE

TEREX® LIGHT TOWERS

WORKS FOR YOU.

TEREX DELIVERS VALUE

At Terex, “**Works For You**” is more than a slogan — it’s a promise. It’s what you can count on from our equipment and the thousands of Terex team members around the world who are here to support you.

Whether you need to dig a hole, process and haul material, work at height, or lift something high into the air — we’ve got the right machine to do the work for you. We offer a wide range of tough, quality equipment for use in the construction, infrastructure, quarrying, mining, shipping, transportation, energy, refining, and utility industries. We make safe, reliable, cost-effective products that aim to improve our customers’ return on investment.

AND THAT’S JUST THE BEGINNING.

Terex® light towers are sold and serviced through Terex Aerial Work Platforms, the same segment of Terex that sells and supports our Genie® brand products. With dedicated service teams available 24 hours a day, 365 days a year, you’ll receive support when you need it most. Add it all up for a return on investment you can take to the bank.

Don’t take our word for it — put Terex light towers on the job and you’ll see what we mean.

Brilliant Features: UHMW side pads are incorporated throughout all Terex light tower mast systems to help provide longer mast life, less friction and a higher level of corrosion resistance by eliminating metal-to-metal mast wear.

ILLUMINATING OPTIONS FOR WORKSITE LIGHTING

Terex offers a heavy-duty light tower to fit virtually any lighting need — from construction sites and sporting events to mining and oil field applications. Terex light towers include a variety of features and options to help improve the productivity of each unit for your specific jobsite needs.

Quality engineering and durable components make Terex® light towers the perfect choice to illuminate your worksite.

INNOVATIVE **LIGHT SOLUTIONS**

INTRODUCING THE NEXT GENERATION OF JOBSITE LIGHTING

Fully featured, towable and self-powered, the Terex® RL™4 LED gas-powered light tower boasts clean, quiet operation and precision lighting performance — rivaling traditional diesel, metal halide models. Competitively priced against traditional units so you get all the benefits of this innovative technology, while also realizing a high rental return on invested capital (rROIC).

Terex RL4 LED light towers are ideally suited for use in short-term rental situations, such as special event venues, airports, municipalities and emergency scene applications.

ADVANTAGES OF LED

Providing a more natural looking light that reduces glare and avoids harsh lighting tones, Terex RL4 LED light towers are equipped with four 230 W LED light panels to provide users with the clear, useable light. LED lights also boast an instant-on/off capability, which means that the lights come on at 100% brightness almost instantly. These LED lights can be turned off quickly and cool immediately. Enjoy 50,000 hours of service life with these panels.

**Terex® RL™4 LED light towers
illuminate benefits beyond
traditional diesel, metal halide units.**

ADVANTAGES OF GAS-POWERED

Driven by a Champion gas engine coupled with an innovative 3.5 kW inverter generator. Equipped with a 17.5 gal fuel tank, users can get up to 80 hours of run time per tank. It is EPA/ CARB compliant and equipped with wireless start capabilities.

Boasting quiet operation — 58 dBA at 23 ft under full load — the Terex RL4 LED Light tower is ideal for use in urban areas and other noise-sensitive work environments.

With 2 kW of convenience power, Terex RL4 LED light towers are powerful enough to run up to three units at one time from a single engine and two additional units on stand-by, as well as tools and accessories. And, they can be plugged into a standard wall outlet to run off the power grid for completely emissions-free operation.

RELIABLE

PERFORMER

From building and highway construction uses to remote oil field applications and sporting events the Terex® RL™4 light tower has a reputation for being a reliable, cost-effective performer in the field. Designed for transporting up to 17 units on one 48 ft trailer, the compact size of the RL4 means you can minimize money spent on freight, while maximizing shipping efficiency.

* As a reminder you should always properly secure all units prior to transport.

REDUCED SETUP TIME

This light tower's vertical mast dramatically cuts setup time by using only one, self-braking winch for fast, easy tower erection and extension. And, the vertical mast reduces the potential for damage during transit. Its 23.4 ft (7.13 m) extended-height tower offers 359° non-continuous tower rotation, allowing for quick setup and pinpoint light positioning.

LONGER RUNTIME

Equipped with a 45 gallon (170 L) tank, the RL4 boasts an approximate 90 hours of runtime without refueling. With the optional autostart feature, which utilizes a photocell or timer, the unit can automatically turn on and off and run without manually having to fire it up.

PLENTY OF CHOICES

Various engine and hitch configurations are available on the RL4 to meet your specific jobsite needs, as well as the Genie-branded color scheme to match the rest of your equipment fleet. An optional cold-weather package keeps your investment running at peak performance year-round.

COST-EFFECTIVE AND CAPABLE

The Terex® AL™4 offers a durable, cost-effective solution for worksite lighting. These heavy-duty light towers are the right fit for virtually any lighting need – from construction sites and sporting events to mining and oil field applications. The 30 ft (9.14 m) extended-height floodlight tower of the AL4 provides 4,000 Watts of light and 359° non-continuous tower rotation that allows precise positioning of the light. Designed to help you get the job done on time and on budget, the AL4 light tower offers the right combination of capabilities and value.

HEAVY-DUTY DESIGN

Designed with galvanized mast and outriggers means that AL4 models are able to resist rust and durable enough withstand the rigors of heavy use. These light towers also feature a more robust axle and chassis design, as well as larger 15 in (38 cm) tires, to provide more stability to the frame and the ability to handled being towed even on the roughest roads.

POWERFUL PRODUCTIVITY

Industry-proven, heavy-duty Kubota® engines and a 6 kW generator come standard AL4 light tower, providing reliable power each time the unit turns on. These units also boast a quiet 71 dBA sound level at 23 ft (7 m) during operation and fuel-efficient operation for up to 60 hours of run time per tank.

SIMPLE SERVICE

Quick connect light fixtures and ballasts boxes allow for easy troubleshooting, service and repair, which translates into less downtime and higher utilization. Standard engine protection includes auto shutdowns to protect your investment from internal issues.

AL4

FLEXIBILITY AND POWER

With its 359° rotation, optional 20 kW generator and ability to light up the jobsite from its extended 30 ft (9.1 m) floodlight tower, the Terex® AL™5 light tower is designed to give you ultimate worksite flexibility. Need even more from your light tower? Terex offers the AL5 HT light tower model — supplying the height, reach and articulation to place light exactly where you need it. This adaptable lighting solution is ideal for mines, railroads, large construction venues and more.

PRACTICAL OPTIONS

Generator options up to 20 kW allow you to use the lights and power receptacles at the same time — ideal for powering extra tools. Additional options on the AL5 light tower include 6-light configuration and mechanical automatic air shutdown system.

SIMPLE TO TRANSPORT, SIMPLE TO USE

The trailer-mounted AL5 HT light tower is easy to tow from site to site — or load up to five units in one truckload. Simple pictograph symbols and easy to use controls make operation straightforward.

DURABLE PROTECTION

A weather-resistant cabinet, lockable covers and internal light storage system help safeguard the AL5 light tower against the rigors of the jobsite. Plus, excellent serviceability is provided by large cabinet doors, quick-disconnect lights and ballasts, and engine compartment lights to improve nighttime visibility for service and operation.

With over 28 ft (8.5 m) of vertical height and 20 ft (6.1 m) of horizontal outreach, the Terex AL5 HT light tower is perfect for mining industry applications.

DURABLE DESIGN

The AL5 light tower has a galvanized mast with 359° rotation for pinpoint positioning of the light. Galvanized outriggers with pre-set position stops allow quick and proper spacing. Plus, an internal storage system for light fixtures provides safekeeping and protection during transport.

SUPERIOR LIGHT POSITIONING

The AL5 HT light tower includes a rotating, articulated hydraulic mast that can reach out to the front, back and side for additional flexibility. The light bar also tilts 180° — and each light can point in a specific direction as well using a simple spring clip.

VERSATILE, DURABLE MAST OPTIONS

The AL5 light tower is now available with a vertical mast for speedy deployment and even more accurate positioning, efficiency and safety on the jobsite. With the electric rather than hydraulic winch, and one switch next to the control panel to activate, the mast lifts in just 30 seconds. Plus 350 degree rotation both raised and stowed means ease of access and on-the-fly adjustments while the mast's four quick disconnect lights are repositioned.

Both the laydown and vertical mast models of the AL5 light tower offer a standard heavy-duty galvanized mast and outriggers to prevent corrosion in harsh environments, and internal cabinet storage to protect lights during transport, for maximum reliability and less downtime.
