

OMEGA 700

FLOOR GRINDERS

OMEGA 700 FLOOR GRINDER

The **OMEGA 700** is engineered with an extensive background of knowledge and development, combined with years of experience designing single headed grinders, as well as complex counter-rotating, multi-headed units. For the first time, the two working principles have been unified – the **OMEGA 700** excels, due to its immense ability to achieve the high production speeds of a single headed grinder, while still maintaining the ability to produce incredible torque and high grinding pressures, which counter-rotating units are known for. The result is a unique, new machine which is perfect for a wide range of applications and floors. Use the **OMEGA 700** for maximum speed and performance in surface preparation with its aggressiveness in grinding concrete and removing coatings, sealers and glue. Due to its unique design, the same machine provides you the finesse necessary to polish terrazzo, natural stone, and a wide variety of coatings and designer floors.

Order No: **OMEGA-700 US**

- "Best of Both Worlds!" - The speed control provides aggressive grinding, as well as precision polishing and cleaning
- Superb ergonomics for operator comfort and ease of handling
- Flexible tool brackets ensure uniform grinding pressure
- Easy transport
- Powered by 11kW (15 hp) motor
- Speeds up to 750 rpm
- Extensive range of diamond tooling

Recommended Dust Collector :
R2D2 or Tornado

OMEGA 700 SPECIFICATIONS:

MAXIMUM WORKING WIDTH : 28 in (700 mm)

MOTOR : 11 kW (15 hp)

VOLTAGE : 480 V, 60 Hz, 3 Phase, 22 Amps

DIMENSIONS : 37 x 41 x 29 in

WEIGHT : 408 lbs

ROTATION : Variable from 0 - 750 rpm

(Also available in 230 V)
