User Information

Foreword/Service Information

These instructions include:

- Safety regulations
- Operating instructions
- Maintenance instructions

These instructions have been prepared for operation on the construction site and for the maintenance engineer.

These instructions are intended to simplify operation of the machine and to avoid malfunctions through improper operation.

Observing the maintenance instructions will increase the reliability and service life of the machine when used on the construction site and reduce repair costs and down-times.

Always keep these instructions at the place of use of the machine.

Only operate the machine as instructed and follow these instructions.

Observe the safety regulations as well as the guidelines of the civil engineering trade association. Observe safety rules for the operation of equipment and the pertinent regulations for the prevention of accidents.

Stone Construction Equipment, Inc. is not liable for the function of the machine when used in an improper manner and for other than the intended purpose.

Operating errors, improper maintenance and the use of incorrect operating materials are not covered by the warranty.

The above information does not extend the warranty and liability conditions of business of Stone Construction Equipment, Inc.

Limited Warranty

The Manufacturer warrants that products manufactured shall be free from defects in material and workmanship that develop under normal use for a period of 90 days for concrete vibrators and electric pumps, one year for Rhino®, Bulldog®, Wolfpac Rollers™, trowels, Stompers®, saws, forward plates, engine powered pumps, and 6 months for all other products from the date of shipment. The foregoing shall be the exclusive remedy of the buyer and the exclusive liability of the Manufacturer. Our warranty excludes normal replaceable wear items, i.e. gaskets, wear plates, seals, O-rings, V-belts, drive chains, clutches, etc. Any equipment, part or product which is furnished by the Manufacturer but manufactured by another, bears only the warranty given by such other manufacturer. (The Manufacturer extends the warranty period to "Lifetime" for the drum bearings and seals for the mortar mixers, and agrees to furnish, free of charge, the bearings and seals only upon receipt of the defective parts. The warranty is two years for eccentric bearings on the forward plate compactors, mortar and plaster mixer drums, trowel gearboxes and five years on the Bulldog trench roller eccentric bearings.) A Warranty Evaluation Form must accompany all defective parts. Warranty is voided by product abuse, alterations, and use of equipment in applications for which it was not intended, use of non-manufacturer parts, or failure to follow documented service instructions. The foregoing warranty is exclusive of all other warranties whether written or oral, expressed or implied. No warranty of merchantability or fitness for a particular purpose shall apply. The agents, dealer and employees of Manufacturer are not authorized to make modification to this warranty, or additional warranties binding on Manufacturer. Therefore, additional statements, whether oral or written, do not constitute warranty and should not be relied upon.

The Manufacturer's sole responsibility for any breach of the foregoing provision of this contract, with respect to any product or part not conforming to the Warranty or the description herein contained, is at its option (a) to repair, replace or refund such product or parts upon the prepaid return thereof to location designated specifically by the Manufacturer. Product returns not shipped prepaid or on an economical transportation basis will be refused (b) as an alternative to the foregoing modes of settlement - the Manufacturer's dealer to repair defective units with reimbursement for expenses, except labor, and be reviewed with the Manufacturer prior to repair. A Warranty Evaluation Form must accompany all warranty claims.

Except as set forth hereinabove and without limitation of the above, there are no warranties or other affirmations which extends beyond the description of the products and the fact hereof, or as to operational efficiency, product reliability or maintainability or compatibility with products furnished by others. In no event whether as a result of breach of contract or warranty or alleged negligence, shall the Manufacturer be liable for special or consequential damages including but not limited to: Loss of profits or revenues, loss of use of the product or any associated product, cost of capital, cost of substitute products, facilities or services or claims of customers.

No claim will be allowed for products lost or damaged in transit. Such claims should be filed with the carrier within fifteen days.

Effective April 1, 1998.

Technical Data

Machine Sound and Vibration Measurements

Sound and Vibration Measurements

Sound Pressure Values as measured are per the following:	
Noise 1	Model/Configuration
Sound Pressure	655PM 8hp Honda
Tow pole end	92dBA
Cowl end right side (exhaust)	98dBA
Cowl end back of unit	98dBA
Cowl end left side	94dBA
Sound Pressure measurements were taken with Simpson model 886-2 type 2 meter, calibrated 2/21/97	
Acceleration measurements were taken with Quest Tech model VI-100 meter, calibrated 4/17/96	
Sound and vibration measurements obtained with machine operating at maximum.	
Test date was 7/29/98 with test conditions at 23 degrees Celsius

Technical Data

Location and Use of Controls

Before operating this unit, it is important to familiarize yourself, and any other personnel who will be using it, with the location and proper use of the controls to insure safe and efficient operation.

- A. Always make sure that the drum latch is in the lock position (down) before starting up machine. With engine running, turn clutch lever to the right to turn paddles or to the left to stop.

- B. To dump mix from drum, stop paddles, move drum latch up and pull dump handle down. Always use caution when dumping mix.

- C. Always grease drum seals as recommended in the maintenance chart. The grease purges dirt--prolonging bearing life.

- D. Always keep drum and paddles clean. Never run machine with hardened mix or foreign objects in drum--doing so damages paddles and/or engine.

SAFETY

These machines are designed to carry out the function of mixing material of the non-cohesive, bituminous and granular varieties.

If used correctly, they will provide an effective and safe means of mixing and meet the appropriate performance standards.

It is essential that the operator of the machine is adequately trained in its safe operation, be authorized to operate it, and have sufficient knowledge of the machine to ensure that it is in full working order, before being put to use.

Health & Safety

Safety Precautions

- Before using this equipment, study the entire Owner's Manual to become familiar with its operation. Do not allow untrained or unauthorized personnel, especially children, to operate this equipment. Use only factory authorized parts for service.

- When warning decals are destroyed or missing, contact the Manufacturer immediately at 1-800-888-9926 for replacement. For the safety of yourself and others, it is imperative that the following rules are observed. Failure to do so may result in serious injury or death.

- This notation appears before warnings in this manual. It means that the following steps must be carried out to avoid the possibility of personal injury or death. These warnings are intended to help the technician avoid potential hazards encountered in normal service procedures. We strongly recommend the reader take advantage of the information provided to prevent personal injury or injury to others.

Warning - Loose Hardware

- With power off, daily check for loose hardware. Immediately inform your supervisor to have it corrected--Do Not Run the Mixer.

Warning-Handling Fuel

- Transport and handle fuel only when contained in approved safety containers.
- Do not smoke when refueling the mixer or during any other fuel handling operation.
- Do not refuel the mixer with the unit running or while hot.
- If fuel is spilled during refueling, wipe it off the engine immediately and discard the rag in a safe place.
- Do not operate the equipment if fuel or oil leaks exist – repair immediately.
- Never operate this equipment in an explosive atmosphere.

Health & Safety

Safety Precautions

Warning-Operating

- Never perform any work on the mixer while it is running.
- Before working on the mixer, stop the engine and unplug/disconnect the spark plug wire(s) to prevent accidental starting. If electric, unplug motor.
- Keep cowl closed during operation.
- Keep hands, clothing and jewelry away from all moving parts.
- Keep all guards in place, including drum guards.
- Never stick your hands or any solid object into the drum while it is in operation.

Warning-Hot Surfaces

- Avoid contact with hot exhaust system and engines.
- Allow engine to cool before performing any repairs or service.

Warning-Ventilation

- Never operate any gas powered mixer in a poorly ventilated or enclosed area.
- Avoid prolonged breathing of exhaust gases.

Warning-Extension Cords

- Always use the proper size grounded extension cord, conforming to the National Electric Code and Local Ordinances.
- Inspect all extension and electrical cords for cuts, frayed wire and broken connectors before use. Do not use cords if not in good condition.
- Do not route extension cords through standing water.
- Do not operate the mixer in standing water.
- When cleaning the mixer, never spray water over the motor.

Health & Safety

Safety Precautions

Warning-Eye Protection

- Always wear splash goggles when operating mixer.

Warning-Towing

- Warning: Do not tow the mixer with the drum in the dump position. Mixer may become unstable and tip over when hitting a curb, pothole, or other obstruction.

- Warning: Always properly attach safety chains before mixer is towed. Maximum towing speed 65 m.p.h. (105 km/hr). Reduce speed according to highway conditions.

- Never leave mixer unattended while running.
- Mix only Mortar, Plaster, Terrazzo, Fireproofing and Grout.
- Do Not operate machine if rocks, stones, ice or frozen materials are in mix and/or in drum of mixer. The machine could jam, causing damage to the equipment or injury to the operator.

IMPORTANT

***THE PERSON ATTEMPTING ANY OF THE
FOLLOWING MAINTENANCE TASKS, MUST BE
AUTHORIZED TO DO SO AND HAVE READ AND
UNDERSTOOD ALL SECTIONS WITHIN THIS
MANUAL***

Maintenance

Wheel Bearing Lubrication/Wheel Bearing Adjustment/Hardware/Towing

WHEEL BEARING LUBRICATION--Fill wheel hub with grease to inside diameter of outer races and also fill hub grease cap. Never use grease heavier than 265 A.S.T.M. penetration (No. 2 grade). Grease bearing cone by machine or by hand method. Force grease between rollers, cone and cage. (If Ball Bearing Hub: force grease between balls.) It is not recommended that a pressure grease fitting be installed on the hub.

WHEEL BEARING ADJUSTMENT--Tighten the adjusting nut with a 12" wrench, at the same time turn the wheel in both directions, until there is a slight bind to be sure all bearing surfaces are in contact. Then back off adjusting nut 1/6 to 1/4 turn or to the nearest locking hole or sufficiently to allow the wheel to rotate freely within limits of 0.001" to 0.010" end play. Lock nut at this position.

HARDWARE--Periodically inspect all hardware on the mixer and engine / motor. Loose hardware can contribute to early component failure and poor performance.

NOTE: Some hardware is used to retain parts that have to move freely for correct operation of this unit. These items include the guard lifter and drum guard. The hardware for these items should be snug enough to prevent excessive play, yet loose enough to allow the parts to pivot freely.

TOWING--Before attempting to tow this mixer, check the state and local laws that apply to your intended route and check the following:

1. Hitch attached to the towing vehicle securely.
2. Tow pole fully extended and bolted to mixer securely.
3. Safety chain hooked up properly (see illustration below or decal on mixer front post).

4. Drum in the mixing position and drum latch engaged, clutch lever in the up position.
5. Lug nuts and axle mount nuts tight.

6. On extendible axles, axle extended to full width and adjustment bolts tight.

7. On spring axles - spring mounting hardware tight, main springs and snubber springs not cracked or broken.
8. Tires in good shape and at proper inflation, for maximum safety and load capacity tires should be inflated to the following pressures:

Tire size 4.80 x 12 @ 60 P.S.I.

Tire size 6.50 x 13 @ 32 P.S.I.

Refer to FRAME AND DRUM ASSEMBLY, STANDARD AXLE ASSEMBLY and SPRING AXLE ASSEMBLY sections of this manual for parts identification and location.

Maintenance

Bull Gear Assembly

Bull Gear Assembly

1. Align Bull Gear key way opposite to gear mesh.
2. Adjust pinion for tooth alignment and engagement using .010" feeler gage.
3. Tighten all four (4) pillow block bolts before removing feeler gage.

Maintenance

Bearing & Seal Installation

Instructions for Seal & Bearing Assembly Kits
P/N's 23430 & 23431
STONE® Mortar Mixers
465PM, 645PM, 655PM, 755PM, and 855PM

ITEM	P/N	DESCRIPTION	QUANTITY
1	24017	Washer	2
3	24022	Seal Drum Shaft	1
6	25881	Washer Split	1
2	32003	Bearing	1
14	32324	Seal Drum Yellow	3

1. Disassemble drum from frame and remove. Unscrew end bolts from paddle shaft and remove spacers and bull gear.
2. Attach a three-jaw puller to ring on housing, center puller on paddle shaft and remove housing and bearing.
3. Remove worn components and clean shaft and housing as needed.
4. Assemble seals and spacers over paddle shaft, flush with drum end using soapy water mixture as lubricant.
5. Make sure seals are assembled tight up to drum end; inner lip of seals curve inwards towards drum end as illustrated.
6. Insert bearing into housing and slide over shaft and seals as illustrated.
7. Tighten housing evenly to drum end so as not to pinch seals.
8. Reassemble spacer, bull gear (if applicable), washer and bolt to paddle shaft and repeat steps 4-7 on opposite end and reassemble drum to frame.

⚠ WARNING

Do not run machine with cover open.

⚠ WARNING

Shut off machine to service or clean.

55010

⚠ WARNING

Always stop engine when cleaning or adjusting machine. If electric motor pull plug.

⚠ CAUTION

FOR YOUR SAFETY

- Read owner's service manual before operating or servicing this machine.
- Always keep unauthorized, inexperienced, untrained people away from this machine.
- Rotating and moving parts will cause injury if contacted. Make sure guards and safety devices are in place before this machine is operated.
- Make sure engine is shut down and spark plug wire disconnected before servicing the machine or approaching the moving parts- if electric motor, disconnect plug.
- Never leave machine unattended when operating. Always stop engine or motor before adding fuel or oil.

NOTICE

Contact the manufacturer immediately at 1-800-888-9926 if safety or hazard decals or owner's manual are missing from this equipment.

⚠ DANGER

GASOLINE
Stop engine and extinguish all flames and smoking materials before refueling. Use a safety can.

SAFETY CHAIN

"PATENT #4180281"
CROSS CHAIN UNDER TOW POLE WITH 4" - 5" VERTICAL SLACK
LATCH CHAIN AT DESIRED LENGTH

FOR EXCESS OR STORAGE, INSERT CHAIN INTO HOLE

FEED END THROUGH LINK OF CHAIN BEFORE SECURING WITH CONNECTING LINK
DO THE SAME WITH OPPOSITE END OF CHAIN

FRAME OF TOWING VEHICLE

CAUTION
READ OPERATING INSTRUCTIONS BEFORE RUNNING MIXER
